1. About Equity Trustees Limited

The Responsible Entity

Equity Trustees Limited

Equity Trustees Limited ABN 46 004 031 298 AFSL 240975, a subsidiary of EQT Holdings Limited ABN 22 607 797 615, which is a public company listed on the Australian Securities Exchange (ASX: EQT), is the Fund's responsible entity and issuer of this PDS. Established as a trustee and executorial service provider by a special Act of the Victorian Parliament in 1888, today Equity Trustees is a dynamic financial services institution which continues to grow the breadth and quality of products and services on offer.

Equity Trustees' responsibilities and obligations as the Fund's responsible entity are governed by the Fund's constitution ("Constitution"), the Corporations Act and general trust law. Equity Trustees has appointed T. Rowe Price Australia Limited as the investment manager of the Fund. Equity Trustees has appointed a custodian to hold the assets of the Fund. The custodian has no supervisory role in relation to the operation of the Fund and is not responsible for protecting your interests.

The Investment Manager

T. Rowe Price Australia Limited

T. Rowe Price Australia Limited ("Investment Manager" or "T. Rowe Price") is a subsidiary of the Baltimore-based T. Rowe Price Group, Inc. which is a global investment management organisation with US\$1.34 trillion in assets under management as of 31 March 2023. T. Rowe Price Group provides a broad array of mutual funds, sub-advisory services, and separate account management for individual and institutional investors, retirement plans and financial intermediaries. The organisation also offers sophisticated investment planning and guidance tools. T. Rowe Price's disciplined and risk-aware investment approach focuses on diversification, style consistency and fundamental research.

2. How the T. Rowe Price Global Equity Fund - I Class Works

The Fund is a registered managed investment scheme governed by the Constitution. The Fund comprises assets which are acquired in accordance with the Fund's investment strategy. Direct investors receive units in the Fund when they invest. In general, each unit represents an equal interest in the assets of the Fund subject to liabilities; however, it does not give investors an interest in any particular asset of the Fund.

If you invest in the Fund through an IDPS (as defined in the Reference Guide) you will not become an investor in the Fund. The operator or custodian of the IDPS will be the investor entered in the Fund's register and will be the only person who is able to exercise the rights and receive the benefits of a direct investor. Your investment in the Fund through the IDPS will be governed by the terms of your IDPS. Please direct any queries and requests relating to your investment to your IDPS Operator (as defined in the Reference Guide).

Unless otherwise stated, the information in this PDS applies to direct investors.

Applying for units

You can acquire units by completing the Application Form that accompanies this PDS or completing the online Application Form. The minimum initial investment amount for the Fund is \$500,000, unless otherwise determined by the Responsible Entity.

If completing the hard copy Application Form, it should be sent along with your identification documents (if applicable) to:

T. Rowe Price Australia Limited
C/- LINK Market Services Limited
Locked Bag 5038
Parramatta NSW 2124

Application money should be deposited to the bank account details set out in the Application Form. Please note that cash cannot be accepted.

If completing the online Application Form, please go to <https://link.eappform.com/initiate.aspx?subbrand=troweprice> for further instructions.

We reserve the right to accept or reject applications in whole or in part at our discretion. We have the discretion to delay processing applications where we believe this to be in the best interest of the Fund's investors.

The price at which units are acquired is determined in accordance with the Constitution ("Application Price"). The Application Price on a Business Day is, in general terms, equal to the Net Asset Value ("NAV") of the Fund, divided by the number of units on issue and adjusted for the buy spread ("Buy Spread"). For further details on the Buy Spread, please refer to the paragraph headed "Buy/Sell Spread" under Section 6.

The Application Price will vary as the market value of assets in the Fund rises or falls.

Making additional investments

You can make additional investments into the Fund at any time by sending us your additional investment amount together with a completed Application Form. Please note that the online Application Form cannot be used for making additional investments. The minimum additional investment into the Fund is \$10,000. You can pay using BPAY® (additional investments only) and direct credit payment options.

Distributions

An investor's share of any distributable income is calculated in accordance with the Constitution and is generally based on the number of units held by the investor at the end of the distribution period.

The Fund usually distributes income annually, however Equity Trustees may change the distribution frequency without notice. Distributions are calculated effective the last day of each distribution period and are normally paid to investors as soon as practicable after the distribution calculation date.

Investors in the Fund can indicate a preference to have their distribution:

- reinvested back into the Fund; or
- directly credited to their AUD Australian domiciled bank account.

Investors who do not indicate a preference will have their distributions automatically reinvested. Applications for reinvestment will be taken to be received immediately prior to the next Business Day after the relevant distribution period. There is no Buy Spread on distributions that are reinvested.

In some circumstances, the Constitution may allow for an investor's withdrawal proceeds to be taken to include a component of distributable income.

Indirect Investors should review their IDPS Guide for information on how and when they receive any income distribution.

New Zealand investors can only have their distribution directly credited if an AUD Australian domiciled bank account is provided, otherwise it must be reinvested (refer to the T. Rowe Price Funds New Zealand Wholesale Investor Fact Sheet).

Access to your money

Investors in the Fund can generally withdraw their investment by completing a written request to withdraw from the Fund and mailing it to:

T. Rowe Price Australia Limited
C/- LINK Market Services Limited
Locked Bag 5038
Parramatta NSW 2124

The minimum withdrawal amount is \$10,000. Once we receive and accept your withdrawal request, we may act on your instruction without further enquiry if the instruction bears your account number or investor details and your (apparent) signature(s), or your authorised signatory's (apparent) signature(s).

Equity Trustees will generally allow an investor to access their investment within 14 days of acceptance of a withdrawal request by transferring the withdrawal proceeds to such investors' nominated AUD Australian domiciled bank account. However, Equity Trustees is allowed to reject withdrawal requests and also to make payment up to 30 days after acceptance of a request (which may be extended in certain circumstances) as outlined in the Constitution and Reference Guide.

We reserve the right to accept or reject withdrawal requests in whole or in part at our discretion.

The price at which units are withdrawn is determined in accordance with the Constitution ("Withdrawal Price"). The Withdrawal Price on a Business Day is, in general terms, equal to the NAV of the Fund, divided by the number of units on issue and adjusted for the sell spread ("Sell Spread"). For further details on the Sell Spread please refer to the paragraph headed "Buy/Sell Spread" under Section 6.

The Withdrawal Price will vary as the market value of assets in the Fund rises or falls.

Equity Trustees reserves the right to fully redeem your investment if your investment balance in the Fund falls below \$500,000 as a result of processing your withdrawal request.

In certain circumstances, for example, when there is a freeze on withdrawals, where accepting a withdrawal is not in the best interests of investors in the Fund including due to one or more circumstances outside its control or where the Fund is not liquid (as defined in the Corporations Act), Equity Trustees can deny or suspend a withdrawal request and you may not be able to withdraw your funds in the usual processing times or at all. When the Fund is not liquid, an investor can only withdraw when Equity Trustees makes a withdrawal offer to investors in accordance with the Corporations Act. Equity Trustees is not obliged to make such offers.

If you are an Indirect Investor, you need to provide your withdrawal request directly to your IDPS Operator. The time to process a withdrawal request will depend on the particular IDPS Operator and the terms of the IDPS.

Unit pricing discretions policy

Equity Trustees has developed a formal written policy in relation to the guidelines and relevant factors taken into account when exercising any discretion in calculating unit prices (including determining the value of the assets and liabilities). A copy of the policy and, where applicable and to the extent required, any other relevant documents in relation to the policy will be made available free of charge on request.

Additional information

If and when the Fund has 100 or more direct investors, it will be classified by the Corporations Act as a 'disclosing entity'. As a disclosing entity, the Fund will be subject to regular reporting and disclosure obligations. Investors would then have a right to obtain a copy, free of charge, of any of the following documents:

- the most recent annual financial report lodged with ASIC ("Annual Report");
- any subsequent half yearly financial report lodged with ASIC after the lodgement of the Annual Report; and
- any continuous disclosure notices lodged with ASIC after the Annual Report but before the date of this PDS.

Equity Trustees will comply with any continuous disclosure obligation by lodging documents with ASIC as and when required.

Copies of these documents lodged with ASIC in relation to the Fund may be obtained from ASIC through ASIC's website.

3. Benefits of investing in the T. Rowe Price Global Equity Fund - I Class

An investment in the Fund provides the following benefits and features:

- exposure to larger capitalization global equities that are representative of the highest conviction securities held across sector and/or regional portfolios managed by T. Rowe Price.
- access to the expertise of T. Rowe Price which has a team of senior investment professionals with a long track record of investing in sector or regional specialty portfolios and providing investment insights and facilitate the comparison of stocks on a global basis. The extensive experience of this team is invaluable in its ability to effectively identify strong investment candidates from the universe of potential mid- to large-cap securities.

Rowe Price looks for companies with the potential either for growth or relative improvement, located in industries where the outlook is becoming more attractive. T. Rowe Price believes bottom-up stock selection supported by proprietary, fundamental research can uncover and exploit anomalies among global equities and is the key driver of value-added active management. T. Rowe Price's focus and commitment to fundamental research gives the firm an information edge that is a powerful competitive advantage.

4. Risks of managed investment schemes

All investments carry risks. Different investment strategies may carry different levels of risk, depending on the assets acquired under the strategy. Assets with the highest long-term returns may also carry the highest level of short-term risk. The significant risks below should be considered in light of your risk profile when deciding whether to invest in the Fund. Your risk profile will vary depending on a range of factors, including your age, the investment time frame (how long you wish to invest for), your other investments or assets and your risk tolerance.

The Responsible Entity and the Investment Manager do not guarantee the liquidity of the Fund's investments, repayment of capital or any rate of return or the Fund's investment performance. The value of the Fund's investments will vary. Returns are not guaranteed, and you may lose money by investing in the Fund. The level of returns will vary and future returns may differ from past returns. Laws affecting managed investment schemes may change in the future. The structure and administration of the Fund is also subject to change.

In addition, we do not offer advice that takes into account your personal financial situation, including advice about whether the Fund is suitable for your circumstances. If you require personal financial or taxation advice, you should contact a licensed financial adviser and/or taxation adviser.

Active management risk

Typically, the Investment Manager actively seeks attractive securities to invest in, rather than investing in a predetermined basket of securities, such as a basket of securities that reflects an index. Consequently, as the Fund does not fully replicate the securities by reference to which the benchmark index is calculated, the Fund may underperform relative to its stated benchmark.

Concentration risk

Concentration of investments in the Fund (between individual investments and types of investments) will reduce the potential benefit of diversification. The potential benefit of diversification is to reduce portfolio volatility, all else equal.

Country risk

Investments in foreign companies may decline in value because of sovereign, political, economic or market instability; the absence of accurate information about the companies; and risks of unfavourable government actions such as expropriation and nationalisation. Such securities may be less liquid, more volatile, and harder to value. In times of market disruptions (including but not limited to market closures), security prices may be delayed or unavailable. Some countries may have different legal systems, taxation regimes, auditing and accounting standards with less governmental regulation and transparency. These risks may be higher when investing in emerging markets.

Currency risk

The Fund may invest in securities denominated in currencies other than Australian dollars. If these currencies change in value relative to the Australian dollar, the value of the investment can change. The Investment Manager will not typically hedge currency risk to Australian dollars.

Emerging markets risk

There is a risk associated with investing in securities issued by companies domiciled in countries with less developed political, economic and financial systems.

Fund risk

The Fund could terminate, the fees and expenses could change, the Investment Manager or the Responsible Entity could be replaced and the Investment Manager's investment professionals could change. There is also a risk that investing in the Fund may give different results than investing directly in the underlying assets of the Fund themselves because of income or capital gains accrued in the Fund and the consequences of investment and withdrawal by other investors.

General risks

The market price of investments may go up or down, sometimes rapidly or unpredictably. Assets may decline in value due to factors affecting markets generally or particular industries represented in the markets. The value of an investment may decline due to general market conditions which are not specifically related to a particular company, such as real or perceived adverse economic conditions, supply and demand for particular securities or instruments, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. They may also decline due to factors which affect a particular industry or industries, such as labour shortages or increased production costs and competitive conditions within an industry. During a general market downturn, multiple asset classes may decline in value simultaneously. Further, changes in tax, legal and economic policy, political events and technology failure can all directly or indirectly create an environment that may influence the value of the investments of the Fund.

Individual investment risk

Individual investments of the Fund, for example, securities on a stock exchange, can and do fall in value for many reasons such as changes in a company's internal operations, management, or in its business environment.

Legal risk

Legal risk is the risk of losses to the Fund occurring as a result of legal issues, principally losses due to the non-enforcement of a contract. This non-enforcement may arise from insufficient documentation, insufficient capacity or authority of a counterparty, uncertainty in relation to the interpretation of the law or unenforceability in bankruptcy or insolvency.

There is also risk that laws, including taxation laws, might change, adversely affecting the ability of the Fund to achieve its objective and/or adversely affecting the Fund's performance.

Liquidity risk

There may be times when securities may not be readily saleable (for example a securities exchange imposed limit on price fluctuations on a particular day in both falling and rising market conditions) and this may impact the investment and markets to which the Fund has exposure. If there is an interruption to regular trading in a market generally, or for a particular investment to which the Fund has exposure, there may be delays in processing withdrawal requests.

Operational risk

The Fund may be subject to errors affecting valuation, pricing, accounting, tax reporting, financial reporting, trading and other matters. In addition, in any market, but especially in emerging and frontier markets, there could be losses due to fraud, corruption, political or military actions, seizure of assets or other irregular events.

Pandemic and other unforeseen event risk

Health crises, such as pandemic and epidemic diseases, as well as other catastrophes that interrupt the expected course of events, such as natural disasters, war or civil disturbance, acts of terrorism, power outages and other unforeseeable and external events, and the public response to or fear of such diseases or events, have and may in the future have an adverse effect on the economies and financial markets either in specific countries or worldwide and consequently on the value of the Fund's investments. Further, under such circumstances the operations, including functions such as trading and valuation, of the Investment Manager and other service providers could be reduced, delayed, suspended or otherwise disrupted.

Political risk

There is political risk due to the fragile nature of some of the developing countries in which the Fund may invest. Political instability and/or political disturbances are more common in developing countries than in developed countries and can affect the value of companies domiciled in the affected country. Policy mistakes by governments in developing countries can affect the value of companies domiciled in the affected country. Severe currency depreciation can occur in developing countries.

Small and medium cap stock risk

Stocks of smaller and medium companies may involve greater risk than those of larger, more established companies. This is because smaller and medium companies may be in earlier stages of development, may be dependent on a small number of products or services, may lack substantial capital reserves and/or do not have proven track records. Small cap companies may be more adversely affected by poor economic or market conditions, and may be traded in low volumes, which may increase volatility and liquidity risks.

5. How we invest your money

Warning: When choosing to invest in the Fund or an option of the Fund, you should consider the likely investment returns, the risks of investing and your investment time frame.

Investment objective

The Fund's investment objective is to provide long-term capital appreciation by investing primarily in a portfolio of securities of companies which are traded, listed or due to be listed, on recognised exchanges and/or markets throughout the world including developing countries.

Benchmark

MSCI All Country World Index ex-Australia Net (unhedged).

Minimum suggested time frame

The minimum suggested investment time frame for the Fund is 5 to 7 years.

Risk level

5 (Medium to High).

The risk level ranges from 1 (Very Low) to 7 (Very High) and is determined after a consideration of the Fund's standard risk measure as well as the Investment Manager's internal risk ratings.

The Fund's investment objective is to provide long-term capital appreciation by investing primarily in a portfolio of securities of companies which are traded, listed or due to be listed, on recognised exchanges and/or markets throughout the world including developing countries.

Investor suitability

The Fund may be suitable for investors seeking the potential for moderate capital appreciation over time and greater diversification for their equity investments, that can accept the volatility associated with investing in equities as well as the special risks that accompany global investing.

Investment style and approach

The investment process involves determining the Fund's investment universe, which includes companies traded, listed or due to be listed, on recognised exchanges and/or markets throughout the world including developing countries.

T. Rowe Price leverages the proprietary fundamental research and analysis performed by the organisation's integrated worldwide network of more than 400 equity investment professionals to identify highly recommended companies. T. Rowe Price engages equity investment professionals to identify superior investment ideas, assess opportunities in a global sector context, overlay macroeconomic and local market factors to refine industry and company analysis, and select what it believes to be investments with the most attractive risk-reward characteristics.

The portfolio manager is actively involved with the network of equity investment professionals during the idea generation and refinement process. Ultimately, the portfolio manager applies judgment to construct a focused global portfolio consisting of the highest conviction investment ideas, within a diversified framework of country, sector and company guidelines.

Asset allocation

The assets of the Fund will generally be invested in accordance with the following guidelines:

- The Fund aims to invest in companies which are traded, listed or due to be listed, on recognised exchanges and/or markets throughout the world.
- The Fund may invest a portion of its portfolio in the securities of companies established, or conducting a significant part of their business activity, in countries which T. Rowe Price considers to be developing countries.
- The Fund's foreign currency exposures may be hedged. These hedges will not be made against the Australian dollar but rather will generally be made against the US dollar. The Investment Manager does not anticipate hedging to be a permanent feature of the Fund nor view currency as a primary source of generating returns.
- The Fund may invest in derivatives to gain exposure to certain assets and markets.
- The Fund aims to be fully invested in equities however at times the Fund may hold cash or cash equivalents for transactional purposes.

Due to movements in the market or similar events, the guidelines set out above may not be adhered to from time to time. In these circumstances, the Investment Manager will seek to bring the Fund's investments within the guidelines within a reasonable period of time.

Labour, environmental, social and ethical considerations

The Investment Manager integrates certain environmental, social (including labour standards) and ethical considerations in the selection, retention and realisation of Fund assets, to the extent that the Investment Manager considers those factors may have a material impact on investment performance. However, they are not assessed in accordance with any predetermined weighting or methodology. In addition, the Investment Manager currently does not intend for the Fund to invest in or hold any securities of companies that have direct exposure to the manufacturing of tobacco or key tobacco components (such as tobacco leaf and cigarette filters but excludes packaging). If the extent to which these matters are taken into account is important to your investment decision please refer to T. Rowe Price's ESG collateral which is available at www.troweprice.com.au/investor. The Investment Manager's approach may change between the time you read this PDS and the time you invest, so please consider checking back on these documents before investing.

Fund performance

Up to date information on the performance of the Fund is available by calling the Investment Manager. A free of charge paper copy of the information is also available on request. Past performance is not necessarily a guide to future performance.

Changing the investment strategy

The investment strategy and asset allocation parameters may be changed. If a change is to be made, investors in the Fund will be notified in accordance with the Corporations Act.

6. Fees and costs

DID YOU KNOW?

Small differences in both investment performance and fees and costs can have a substantial impact on your long-term returns.

For example, total annual fees and costs of 2% of your investment balance rather than 1% could reduce your final return by up to 20% over a 30-year period (for example, reduce it from \$100,000 to \$80,000).

You should consider whether features such as superior investment performance or the provision of better member services justify higher fees and costs.

You may be able to negotiate to pay lower fees. Ask the Fund or your financial adviser.

TO FIND OUT MORE

If you would like to find out more, or see the impact of the fees based on your own circumstances, the **Australian Securities and Investments Commission (ASIC) Moneysmart** website (www.moneysmart.gov.au) has a managed funds fee calculator to help you check out different fee options.

The information in the following Fees and Costs Summary can be used to compare costs between different simple managed investment schemes. Fees and costs can be paid directly from an investor's account or deducted from investment returns. For information on tax please see Section 7 of this PDS.

Additional Explanation of Fees and Costs

Management fees and costs

The management fees and costs include amounts payable for administering and operating the Fund, investing the assets of the Fund, expenses and reimbursements in relation to the Fund and indirect costs if applicable.

Management fees and costs do not include performance fees or transaction costs, which are disclosed separately.

The management fees component of management fees and costs of 0.85% p.a. of the NAV of the Fund is payable to the Responsible Entity for managing the assets and overseeing the operations of the Fund. The management fees component is accrued daily and paid from the Fund monthly in arrears and reflected in the unit price. As at the date of this PDS, the management fees component covers certain ordinary expenses such as the Responsible Entity fees, investment management fees, custodian fees, and administration and audit fees.

The indirect costs and other expenses component of 0.00% p.a. of the NAV of the Fund may include other ordinary expenses of operating the Fund, as well as management fees and costs (if any) arising from interposed vehicles in or through which the Fund invests and the costs of investing in over-the-counter derivatives to gain investment exposure to assets or implement the Fund's investment strategy. The indirect costs and other expenses component is variable and reflected in the unit price of the Fund as the relevant fees and costs are incurred. They are borne by investors, but they are not paid to the Responsible Entity or Investment Manager. The indirect costs and other expenses component is based on the relevant costs incurred during the financial year ended 30 June 2023.

Actual indirect costs for the current and future years may differ. If in future there is an increase to indirect costs disclosed in this PDS, updates will be provided on Equity Trustees' website at www.eqt.com.au/insto where they are not otherwise required to be disclosed to investors under law.

Transaction costs

In managing the assets of the Fund, the Fund may incur transaction costs such as brokerage, buy-sell spreads in respect of the underlying investments of the Fund, settlement costs, clearing costs and applicable stamp duty when assets are bought and sold, as well as the costs of over-the-counter derivatives that reflect transaction costs that would arise if the Fund held the ultimate reference assets, as well as the costs of over-the-counter derivatives used for hedging purposes. Transaction costs also include costs incurred by interposed vehicles in which the Fund invests (if any), that would have been transaction costs if they had been incurred by the Fund itself. Transaction costs are an additional cost to the investor where they are not recovered by the Buy/Sell Spread, and are generally incurred when the assets of the Fund are changed in connection with day-to-day trading or when there are applications or withdrawals which cause net cash flows into or out of the Fund.

The Buy/Sell Spread that is disclosed in the Fees and Costs Summary is a reasonable estimate of transaction costs that the Fund will incur when buying or selling assets of the Fund. These costs are an additional cost to the investor but are incorporated into the unit price and arise when investing application monies and funding withdrawals from the Fund and are not separately charged to the investor. The Buy Spread is paid into the Fund as part of an application and the Sell Spread is left in the Fund as part of a redemption and not paid to the Responsible Entity or the Investment Manager. The estimated Buy/Sell Spread is 0.20% upon entry and 0.10% upon exit. The dollar value of these costs based on an application or a withdrawal of \$500,000 is \$1,000 (application) and \$500 (withdrawal) for each individual transaction. The Buy/Sell Spread can be altered by the Responsible Entity at any time and www.eqt.com.au/insto will be updated as soon as practicable to reflect any change. The Responsible Entity may also waive the Buy/Sell Spread in part or in full at its discretion. The transaction costs figure in the Fees and Costs Summary is shown net of any amount recovered by the Buy/Sell Spread charged by the Responsible Entity. Please call the Investment Manager prior to making an investment or withdrawal to obtain the current Buy/Sell Spread.

Transaction costs generally arise through the day-to-day trading of the Fund's assets and are reflected in the Fund's unit price as an additional cost to the investor, as and when they are incurred.

The gross transaction costs for the Fund are 0.03% p.a. of the NAV of the Fund, which is based on the relevant costs incurred during the financial year ended 30 June 2023. An estimated 100% of these transaction costs were recovered by the Buy/Sell spread resulting in a net transactional cost to the Fund of 0.00% p.a.

However, actual transaction costs for future years may differ.

Can the fees change?

Yes, all fees can change without investor consent, subject to the maximum fee amounts specified in the Constitution. The current maximum management fee to which Equity Trustees is entitled is 2% of the GAV of the Fund. However, Equity Trustees does not intend to charge that amount and will generally provide investors with at least 30 days' notice of any proposed increase to the management fees component of management fees and costs. In most circumstances, the Constitution defines the maximum level that can be charged for fees described in this PDS. Equity Trustees also has the right to recover all reasonable expenses incurred in relation to the proper performance of its duties in managing the Fund and as such these expenses may increase or decrease accordingly, without notice.

Payments to the IDPS Operators

Subject to the law, annual payments may be made to some IDPS Operators because they offer the Fund on their investment menus. Product access is paid by the Investment Manager out of its investment management fee and is not an additional cost to the investor. If such payment to IDPS Operators is limited or prohibited by the law, Equity Trustees will ensure the payment of such fees is reduced or ceased.

Differential fees

The Investment Manager may from time to time negotiate a different fee arrangement (by way of a rebate or waiver of fees) with certain investors who are Wholesale Clients or Wholesale Investors. Please call the Investment Manager for further information.

Example of annual fees and costs for an investment option

This table gives an example of how the ongoing annual fees and costs in the investment option for this product can affect your investment over a 1-year period. You should use this table to compare this product with other products offered by managed investment schemes.

EXAMPLE – T. Rowe Price Global Equity Fund - I Class

BALANCE OF \$550,000 WITH A CONTRIBUTION OF \$5,000 DURING THE YEAR

Contribution Fees	Nil	For every additional \$5,000 you put in, you will be charged \$0
Plus Management fees and costs	0.85% p.a.	And , for every \$550,000 you have in the T. Rowe Price Global Equity Fund - I Class you will be charged or have deducted from your investment \$4,675 each year
Plus Performance fees	Not applicable	And , you will be charged or have deducted from your investment \$0 in performance fees each year
Plus Transaction costs	0.00% p.a.	And , you will be charged or have deducted from your investment \$0 in transaction costs
Equals Cost of T. Rowe Price Global Equity Fund - I Class		If you had an investment of \$550,000 at the beginning of the year and you put in an additional \$5,000 during that year, you would be charged fees and costs of: \$4,675* What it costs you will depend on the investment option you choose and the fees you negotiate.

* Additional fees may apply. Please note that this example does not capture all the fees and costs that may apply to you such as the Buy/Sell Spread.

This example assumes the \$5,000 contribution occurs at the end of the first year, therefore the fees and costs are calculated using the \$550,000 balance only.

Warning: If you have consulted a financial adviser, you may pay additional fees. You should refer to the Statement of Advice or Financial Services Guide provided by your financial adviser in which details of the fees are set out.

ASIC provides a fee calculator on www.moneysmart.gov.au, which you may use to calculate the effects of fees and costs on account balances.

The indirect costs and other expenses component of management fees and costs and transaction costs may also be based on estimates. As a result, the total fees and costs that you are charged may differ from the figures shown in the table.

Further reading

You should read the important information in the Reference Guide about fees and costs under the "Fees and other costs" section before making a decision. Go to the Reference Guide which is available at www.eqt.com.au/insto. The material relating to these matters may change between the time when you read this PDS and the day when you acquire the product.

7. How managed investment schemes are taxed

Warning: Investing in a registered managed investment scheme (such as the Fund) is likely to have tax consequences. You are strongly advised to seek your own professional tax advice about the applicable Australian tax (including income tax, GST and duty) consequences and, if appropriate, foreign tax consequences which may apply to you based on your particular circumstances before investing in the Fund.

The Fund is an Australian resident for tax purposes and does not generally pay tax on behalf of its investors. Australian resident investors are assessed for tax on any income and capital gains generated by the Fund to which they become presently entitled or, where the Fund has made a choice to be an Attribution Managed Investment Trust ("AMIT") and the choice is effective for the income year, are attributed to them.

Further reading

You should read the important information in the Reference Guide about Taxation under the "Other important information" section before making a decision. Go to the Reference Guide which is available at www.eqt.com.au/insto. The material relating to these matters may change between the time when you read this PDS and the day when you acquire the product.

8. How to apply

To invest please complete the Application Form accompanying this PDS, send funds (see details in the Application Form) and your completed Application Form to:

T. Rowe Price Australia Limited
C/- LINK Market Services Limited
Locked Bag 5038
Parramatta NSW 2124

Please note that cash cannot be accepted and all applications must be made in Australian dollars.

Who can invest?

Eligible persons (as detailed in the 'About this PDS' section) can invest, however individual investors must be 18 years of age or over. Investors investing through an IDPS should use the application form provided by the IDPS Operator.

Cooling off period

If you are a Retail Client who has invested directly in the Fund, you may have a right to a 'cooling off' period in relation to your investment in the Fund for 14 days from the earlier of:

- the issue of the transaction confirmation statement; and
- the end of the fifth business day after the units are issued.

A Retail Client may exercise this right by notifying Equity Trustees in writing. A Retail Client is entitled to a refund of their investment adjusted for any increase or decrease in the relevant Application Price between the time we process your application and the time we receive the notification from you, as well as any other tax and other reasonable administrative expenses and transaction costs associated with the acquisition and termination of the investment.

The right of a Retail Client to cool off does not apply in certain limited situations, such as if the issue is made under a distribution reinvestment plan, switching facility or represents additional contributions required under an existing agreement. Also, the right to cool off does not apply to you if you choose to exercise your rights or powers as a unit holder in the Fund during the 14 day period. This could include selling part of your investment or switching it to another product.

Indirect Investors should seek advice from their IDPS Operator as to whether cooling off rights apply to an investment in the Fund by the IDPS. The right to cool off in relation to the Fund is not directly available to an Indirect Investor. This is because an Indirect Investor does not acquire the rights of a unit holder in the Fund. Rather, an Indirect Investor directs the IDPS Operator to arrange for their monies to be invested in the Fund on their behalf. The terms and conditions of the IDPS Guide or similar type document will govern an Indirect Investor's investment in relation to the Fund and any rights an Indirect Investor may have in this regard.

No cooling off period applies to investments in the Funds by New Zealand Wholesale Investors.

Exempt investors should attach a copy of the certificate of exemption. For super funds or trusts list only the applicable ABN or TFN for the super fund or trust.
